Re: Asbestos Notification

As a part of an annual notification, we are informing all persons of their option to review the asbestos management plan, which includes documentation of any changes in asbestos containing materials in our school.

To provide continuing management of the asbestos in our school, all asbestos containing materials (ACM) are inspected every six months by an engineering firm from Jackson, MS. Any changes in the ACM are recorded in a surveillance report as part of the management plan.

The inspection of our school buildings has been performed as required. A copy of the re-inspection reports, along with a copy of the management plan is located in the superintendent's office at the school. In addition, a copy of all management plans for the district is maintained in the LEA Asbestos Designee's office located at Forrest County Agricultural High School, 215 Old Highway 49 East, Brooklyn, MS. Any interested party should feel free to go to any of these locations to review these reports.
